

# Morphic Studio Product Architecture Specification

## Document 52 — Story Workspace & Writing Experience Specification

Version: 1.0

Status: Approved

---

### 1. Purpose

This document defines the Story Workspace and Writing Experience for Morphic Studio.

Its objective is to provide a modern, AI-native writing environment that supports long-form storytelling, screenplay development, comics, interactive fiction, game narratives, and other creative writing formats while maintaining deep integration with the platform's knowledge systems.

---

### 2. Design Philosophy

The Story Workspace follows these principles:

- Writing remains the primary focus.
  - AI assists rather than interrupts.
  - Canon consistency is continuously maintained.
  - Context is available without clutter.
  - Every action should be reversible.
  - Collaboration should feel natural.
  - Performance should remain responsive for projects of any size.
- 

### 3. Workspace Layout

The workspace consists of:

## Navigation Panel

Provides access to:

- Projects
  - Books
  - Chapters
  - Scenes
  - Drafts
  - Notes
  - Assets
  - Recent files
- 

## Writing Canvas

Primary editing area supporting:

- Rich text
  - Markdown (optional)
  - Structured story elements
  - Embedded references
  - Inline media
  - Comments
  - AI suggestions
- 

## Context Sidebar

Displays relevant information including:

- Character profiles
- Locations
- Timeline events
- Story Bible entries
- World-building notes
- AI recommendations
- Recent edits

Content updates dynamically based on the current writing context.

---

## Inspector Panel

Provides document-specific tools such as:

- Metadata

- Writing goals
  - Revision history
  - Export settings
  - Sharing options
  - AI actions
- 

## 4. Document Hierarchy

Support hierarchical organization:

Workspace

Project

Book

Part

Chapter

Scene

Section

Paragraph

The hierarchy should remain flexible enough for different storytelling styles.

---

## 5. Writing Modes

Support multiple writing modes including:

- Novel
- Short Story
- Screenplay
- Comic Script
- Interactive Fiction
- Visual Novel
- Game Narrative
- Documentation
- Custom Templates

Each mode provides specialized formatting and workflow support.

---

## 6. AI-Assisted Writing

AI capabilities include:

- Continue writing
- Rewrite text
- Expand scenes
- Summarize content
- Improve dialogue
- Generate descriptions
- Suggest plot ideas
- Improve pacing
- Adjust tone
- Translate content
- Brainstorm alternatives

AI actions always preserve user control and version history.

---

## 7. Live Story Bible Integration

The editor continuously references the Story Bible.

Capabilities include:

- Canon validation
- Character consistency

- Timeline verification
- Location references
- Relationship awareness
- World rule enforcement

Potential inconsistencies are surfaced as recommendations rather than automatic corrections.

---

## 8. Character & World References

Users can reference project entities directly within the editor.

Supported entities include:

- Characters
- Locations
- Organizations
- Artifacts
- Events
- Timeline entries
- Assets

Selecting a reference opens contextual information without leaving the editor.

---

## 9. Revision & Versioning

Support:

- Automatic version history
- Named revisions
- Draft branches
- Compare revisions
- Restore previous versions
- Change tracking
- Author attribution

No user work should be permanently lost.

---

## 10. Collaboration

Support collaborative writing with:

- Real-time editing

- Comments
- Suggestions
- Mentions
- Review workflows
- Task assignments
- Presence indicators

Permissions are enforced through the platform's authorization model.

---

## 11. Focus & Productivity

Provide features such as:

- Focus Mode
- Typewriter Mode
- Full-screen writing
- Writing goals
- Word count targets
- Session timers
- Progress tracking
- Daily streaks (optional)

These tools encourage sustained creative work without distraction.

---

## 12. Search & Navigation

Support:

- Full-text search
- Semantic search
- Character search
- Timeline search
- Scene navigation
- Outline view
- Breadcrumb navigation
- Quick open
- Command palette

Navigation should remain efficient even for very large projects.

---

## 13. Export & Publishing

Support export to:

- PDF
- DOCX
- EPUB
- Markdown
- HTML
- Plain Text
- Screenplay formats (where applicable)

Exports should preserve formatting and metadata when supported.

---

## 14. Accessibility

The writing experience must support:

- Keyboard-first workflows
- Screen readers
- Adjustable typography
- High contrast
- Reduced motion
- Custom shortcuts
- International input methods

Accessibility is a core design requirement rather than an optional enhancement.

---

## 15. Acceptance Criteria

The Story Workspace is successful if:

- Writing remains the primary focus.
  - AI assistance is contextual and non-intrusive.
  - Canon consistency is maintained through guidance.
  - Collaboration is seamless.
  - Version history protects creative work.
  - Navigation scales to large projects.
  - The workspace supports diverse storytelling formats.
-

# Conclusion

The Morphic Studio Story Workspace provides a unified, AI-native writing environment that combines powerful editing capabilities with deep contextual awareness. By integrating the Story Bible, Knowledge Graph, AI Gateway, collaboration tools, and productivity features into a single cohesive experience, it becomes the central creative environment where stories are conceived, refined, and brought to life.
