

Morphic Studio Product Architecture Specification

Document 53 — Character Studio & Character Intelligence System Specification

Version: 1.0

Status: Approved

1. Purpose

This document defines the Character Studio and Character Intelligence System for Morphe Studio.

Its purpose is to enable creators to design, manage, evolve, and interact with intelligent characters whose identities remain consistent throughout the lifetime of a project.

The Character Studio serves as the authoritative source for all character-related information.

2. Design Philosophy

The Character Studio follows these principles:

- Characters are living entities, not static records.
 - Personality drives behavior.
 - Relationships influence decisions.
 - Memory shapes future interactions.
 - Canon takes precedence over AI improvisation.
 - Character evolution is intentional and traceable.
 - Every character integrates with the Knowledge Graph.
-

3. Character Lifecycle

Each character progresses through:

Concept

↓

Draft Profile

Development

Story Integration

Growth

Revision

Archive

Legacy (optional)

Every stage maintains version history.

4. Core Character Profile

Every character includes:

Identity

- Name
- Aliases
- Titles
- Nicknames

General Information

- Age
- Birthdate
- Species

- Gender
- Occupation
- Nationality
- Affiliation

Appearance

- Height
- Build
- Clothing
- Hair
- Eyes
- Distinguishing features
- Visual references

Background

- History
- Family
- Education
- Career
- Significant life events

5. Personality Model

Support structured personality attributes including:

- Core traits
- Strengths
- Weaknesses
- Values
- Beliefs
- Fears
- Desires
- Motivations
- Internal conflicts
- External conflicts
- Habits
- Decision-making style

The model should guide AI-generated behavior.

6. Character Memory

Each character maintains memory across the story.

Memory categories include:

- Personal experiences
- Relationships
- Major events
- Secrets
- Trauma
- Achievements
- Promises
- Goals
- Knowledge acquired

Memory evolves only through validated story events.

7. Emotional State System

Track dynamic emotional attributes such as:

- Mood
- Stress
- Confidence
- Trust
- Loyalty
- Fear
- Hope
- Anger
- Grief
- Motivation

Emotional state may change throughout the narrative and influence AI-generated dialogue or decisions.

8. Relationship Engine

Characters maintain structured relationships with:

- Other characters
- Organizations
- Locations

- Families
- Teams
- Mentors
- Rivals
- Allies

Each relationship records:

- Type
 - Strength
 - Direction
 - History
 - Current status
 - Significant events
-

9. Character Timeline

Track:

- Birth
- Major milestones
- Story appearances
- Personal growth
- Relationship changes
- Skill development
- Injuries
- Death (if applicable)

Timeline entries synchronize with the Story Bible.

10. Dialogue Intelligence

The platform maintains dialogue consistency through:

- Vocabulary preferences
- Speech patterns
- Tone
- Formality
- Accent notes
- Catchphrases
- Emotional expression
- Communication style

AI-generated dialogue should remain faithful to these characteristics.

11. Character Evolution

Support intentional growth over time.

Track changes in:

- Beliefs
- Goals
- Personality
- Skills
- Relationships
- Emotional maturity
- Moral alignment

Every significant evolution should reference the story events that caused it.

12. AI Character Simulation

Users may interact with characters through AI.

Capabilities include:

- In-character conversations
- Decision simulations
- Interview mode
- Motivation analysis
- Consistency checks
- Alternate scenario exploration

Simulation never modifies canonical character data without user approval.

13. Visual Identity

Support:

- Portrait gallery
- Reference images
- Outfit variations
- Expression sheets
- Pose library
- Color palettes

- Style references

Visual assets remain linked to the character profile.

14. Integration

Character Studio integrates with:

- Story Workspace
- Story Bible
- Knowledge Graph
- Creative Memory
- AI Gateway
- Asset Manager
- Workflow Engine
- Timeline
- Collaboration Tools

Changes propagate automatically where appropriate.

15. Analytics

Provide insights including:

- Appearance frequency
- Dialogue distribution
- Relationship network
- Emotional progression
- Character development milestones
- Story impact
- AI usage statistics

Analytics assist creators without dictating creative choices.

16. Acceptance Criteria

The Character Studio is successful if:

- Characters remain internally consistent.
- AI respects established personalities.
- Relationships evolve logically.
- Character memory reflects story events.

- Dialogue remains recognizable.
 - Growth is traceable.
 - Character information integrates seamlessly with the broader platform.
-

Conclusion

The Morphe Studio Character Studio transforms characters from simple profiles into intelligent, evolving entities with structured identities, memories, emotions, relationships, and developmental arcs. By integrating deeply with the Story Bible, Knowledge Graph, AI Gateway, and Creative Memory systems, it ensures that characters remain authentic, coherent, and engaging throughout every stage of the creative process.
